

As part of its commitment to society, its people and the environment, SMT Intelligence conducts an in-depth annual assessment of its sustainability practices through EcoVadis, the global standard for corporate sustainability assessment.

The EcoVadis evaluation incorporates 21 sustainability criteria divided into four main themes: Environment, Labor & Human Rights, Ethics and Sustainable Procurement. In our last evaluation, which was completed in March 2024, we achieved a bronze rating, reflecting our progress in sustainability. We recently received bronze certification for our sustainability performance from EcoVadis.

This certification is an important validation for our company and can have a positive impact on our brand and reputation in the marketplace.
